Education

University of Waterloo

Bachelor of Computer Science

Waterloo, ON | 2023 – 2027

- Relevant Coursework: Object-Oriented Software Development (C++), Data Structures (C++), Algorithm Design (C)

Experience

Super.com

Software Engineering Intern

San Francisco, CA | Sep 2025 – Dec 2025

- Developed flight supply adapters at a **\$1B** unicorn to cut supplier costs by **20%** and add **300k+** new flight options
- Leveraged **React** and a **Python** backend to launch seat selection, baggage, and insurance features **end-to-end**
- Reduced flight search API latency by **30%** across multiple suppliers to improve booking conversion rate by **10%**

Ford Motor Company

Software Engineering Intern

Dearborn, MI | Jan 2025 – Apr 2025

- Built a proprietary **Android** Calendar app for EV systems using UX case studies of CarPlay and Tesla's calendars
- Engineered a data integration pipeline to enable seamless synchronization across **6+** calendar provider APIs
- Integrated **Amazon Alexa** using **Java** to enable voice controls for Ford's latest 2027+ infotainment systems
- Implemented **20+** UI components in **Android Studio** using **Kotlin** while developing extensive **Gherkin** tests

University of Waterloo IS&T

Software Engineering Intern

Waterloo, ON | May 2024 – Aug 2024

- Led the development of **JADA** , a tool used by **26K+** co-op students to streamline the internship search process
- Featured on **Microsoft News** , **UWaterloo News** , and **Waterloo Regional News**  as a lead developer
- Designed a **C# REST API** to periodically scrape 3+ job boards using **GPT-4o** and **Azure** to categorize job data
- Developed a responsive **Vue.js** and **TypeScript** frontend that tailors job listings based on individual student data

FIRST Robotics Design Team

Software Engineering

Vancouver, BC | Mar 2019 – Apr 2023

- Founded and led the team to be **2022 World Championship** award winners at Houston, Texas among **60+** competing countries, and secured **1st place** in British Columbia in 2019, 2020, and 2022 with **19+** awards
- Established the robot's control system using **Java** and **Android SDK**, maintaining reliability for 4+ years
- Reduced the robot's task iteration time by 50% by using **Python** and **TensorFlow** to optimize object detection

Projects

Tune Scribe – MP3 to Sheet Music Converter

github.com/evanyans/tunescriber

- Created a **React** app that converts raw audio files into instrument tracks to individual sheet music for each track
- Built a **Flask** backend to manage the conversion pipeline with Whisper  from OpenAI to handle lyrics processing

Credit Crimes – Puzzle Game

github.com/evanyans/credit-crimes

- Winner of Hack Western 2023 for **Best Game Hack** from Big Blue Bubble , and **top 5** out of 70 projects overall
- Developed core game features such as the player interaction system and the game state manager using **C#**

Skills

Languages: C/C++, C#, TypeScript, JavaScript, Python, Java, Kotlin, SQL, Swift, HTML/CSS

Technologies: Git, GitHub, Azure, MongoDB, Android SDK, Figma, Adobe Suite, JIRA

Frameworks/Libraries: React, Vue.js, Node.js, ASP.NET, TensorFlow, Flask
